EXPERIENCE

Senior Cloud Architect - DevOps Engineer

Reply

From Apr 2023

Milan (IT)

<https://www.reply.com/en/>

My focus as a Senior Cloud Architect is on customer satisfaction. I am helping bank and insurance customers migrate to the cloud and design infrastructure and networks to support their workloads improving customer experience and operational efficiency. I am currently helping several companies to initiate their cloud journey with foundation tasks using Google Cloud Platform.

Cloud Architect - DevOps Engineer

My aim is to help my clients achieve their goals by leveraging the resources of Amazon Web Services. I design solutions, develop the infrastructure with IAC tools and supervise various cloud projects as DevOps Engineer.

I also developed an infra standardization framework, with the aim of reducing overall cloud costs and improving Git projects management. Actually this framework is the baseline of every Git project for a top global-grade insurance company.

Software Engineer

Polycube

1 year

<https://polycube.network/>

www.github.com/polycube-network/polycube

eBPF and XDP based open source software framework that provides fast and lightweight network functions such as bridges, routers and firewalls.

Polycube services, called cubes, can be composed to build arbitrary service chains and provide custom network connectivity to namespaces, containers, virtual machines, and physical hosts.

PROJECTS

NcMonitor

Nextcloud monitor WearOS app

<https://github.com/DavideAG/NcMonitor>

NcMonitor is a native WearOS application written in Kotlin that can be used to check the state of your Nextcloud server. It is simple, fast and light. You have just to look up at your wrist to know if your NC instance is working properly or not.
